

I benefit from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear . I Respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve. Note: I am purchasing a new car with the XM radio already installed and am purchasing 2 additional units so I can install one in my recreational vehicle and have one permanently in the house----I am tired of continually unhooking from the car and rehooking to the home base unit.
